LETTER FROM THE PRESIDENT

MLS has been busy this month with various negotiations, staffing issues, and the Annual REALTOR® EXPO which was a huge success! Thus our statistics are a few days behind. We regret any inconvenience this may have caused.

As temperatures begin to go down, open house traffic seems to be increasing a bit. Total sales volume as well as total unit sales have gone down from last year, however they have increased from last month. This reflects a normal seasonal trend in Tucson during the Summer/Fall shift. The listing inventory continues to climb at record levels with 9,401 active listings in August 2006. This reflects a 113.42% increase over August 2005. Market times are being affected by this growing inventory. The average market time has risen to 53 days as opposed to 26 days at this time last year. Buyers have a large choice of suitable properties and are taking the time to do good research.

Sales Analysis

Sales Price Slowing

The increase in average sales price is beginning to slow with only a 0.93% increase over last August. The average sales price has fallen to December 2005 levels, at \$268,408. Expect to see a leveling effect for the next few months. Prices have fallen slightly compared to the average prices seen in June and July 2006.

Median Sales Price Decreases Over July 2006

Median sales price is up slightly over this time last year, however it has dropped almost \$5,000 from last month. This indicates that the large inventory and increase in market times are beginning to have an impact on prices.

New Listings Continue to Fluctuate

New listings continue to come on the market. However, the overall trend since January 2006 has remained fairly level with normal seasonal shifts. 3,145 new listings came on the market in August 2006, which is up from July, but similar to numbers seen in January, March and May 2006.

Time on Market Increases Slightly

The average time on market increased from 49 days in July 2006 to 53 days in August 2006. While this is a sharp increase from averages seen in 2005, it is consistent with the average times seen in 2002 and 2003.
